

Viasat Initiates Mechanical Integration on ViaSat-3

Aug 4, 2022

Satellite Enters Key Launch Configuration Integration Phase

CARLSBAD, Calif., Aug. 4, 2022 /PRNewswire/ -- [Viasat Inc.](#) (NASDAQ: VSAT), a global leader in satellite communications, announced today the first ViaSat-3 satellite is now in the mechanical environments build process. The process milestone involves the attachment of the solar arrays, reflectors and other items which will result in the satellite being in its full, launch configuration for the first time.

"Entering the mechanical environments build process is a very significant milestone toward completing the satellite and readying it for flight later this year," said Dave Ryan, president, Space & Commercial Networks at Viasat. "These efforts demonstrate our momentum to ready the satellite for launch."

The ViaSat-3 class of Ka-band satellites is expected to provide the best bandwidth economics in the industry with incredible flexibility to move and concentrate that capacity virtually anywhere there is demand - whether it is over land, the ocean or in the air. The first two satellites are planned to focus on the Americas and on EMEA, respectively. The third ViaSat-3 payload is undergoing final integration and testing and will focus on the Asia Pacific region, completing Viasat's global service coverage.

Forward-Looking Statements

This press release contains forward-looking statements that are subject to the safe harbors created under the Securities Act of 1933 and the Securities Exchange Act of 1934. Forward looking statements include among others, statements about the performance, capabilities and anticipated benefits of the ViaSat-3 class satellite platform, expected capacity, service, speeds, coverage, flexibility and other features of the ViaSat-3 constellation, and the timing of hardware delivery and service launch. Readers are cautioned that actual results could differ materially from those expressed in any forward-looking statements. Factors that could cause actual results to differ include: risks associated with the construction, launch and operation of the ViaSat-3 class satellites and Viasat's other satellites, including the effect of any anomaly, operational failure or degradation in satellite performance; the ability to realize the anticipated benefits of the ViaSat-3 satellite platforms; unexpected expenses or delays related to the satellite system; the ability to successfully implement Viasat's business plan for broadband satellite services on Viasat's anticipated timeline or at all, including with respect to the ViaSat-3 satellite platforms; contractual problems, product defects, manufacturing issues or delays; regulatory issues; technologies not being developed according to anticipated schedules, or that do not perform according to expectations; and increased competition and other factors affecting the connectivity sector, generally. In addition, please refer to the risk factors contained in Viasat's SEC filings available at www.sec.gov, including Viasat's most recent Annual Report on Form 10-K and Quarterly Reports on Form 10-Q. Readers are cautioned not to place undue reliance on any forward-looking statements, which speak only as of the date on which they are made. Viasat undertakes no obligation to update or revise any forward-looking statements for any reason.

About Viasat

Viasat is a global communications company that believes everyone and everything in the world can be connected. For over 35 years, Viasat has helped shape how consumers, businesses, governments and militaries around the world communicate. Today, the Company is developing the ultimate global communications network to power high-quality, secure, affordable, fast connections to impact people's lives anywhere they are—on the ground, in the air or at sea.
