

Viasat and Inmarsat Will Work with CMA to Demonstrate Customer Benefits of Proposed Transaction

October 14, 2022

CARLSBAD, Calif., and LONDON, Oct. 14, 2022 /PRNewswire/ -- [Viasat Inc.](#) (NASDAQ: VSAT), a global communications company, and Inmarsat, a leading provider of global mobile satellite communications services, look forward to working with the UK's Competition and Markets Authority (CMA) to demonstrate how the planned combination of the companies will benefit customers by improving efficiencies, lowering costs, and increasing the availability of in-flight connectivity (IFC) around the world.

The CMA announced today it will refer the transaction to a Phase 2 investigation. Viasat and Inmarsat remain confident that the transaction will increase the availability of more affordable, faster, and more reliable IFC globally to operators, airlines, and passengers. While the market is still nascent, existing providers Panasonic and Intelsat combined represent more than 75% of the long-haul IFC market.

IFC is an attractive market which is also attracting new providers such as Starlink, Eutelsat/OneWeb and Telesat. According to multiple reports, over the last three years these new market entrants have raised over \$20 billion in new capital illustrating both the attractiveness of the markets and the intensity of competition.

Mark Dankberg, Viasat's CEO and executive chairman, said: "Our market success to date has been driven by applying innovative technologies to increase IFC speeds, reliability, and affordability. Our investments in the ViaSat-3 constellation and the Inmarsat transaction are intended to help us make these services more available globally. Industry analysts anticipate that an already highly competitive IFC market will become even more competitive with the entrance of new, heavily financed LEO competitors. We believe that a comprehensive Phase 2 analysis will support that our transaction will benefit the nascent, but rapidly growing IFC services available to airline passengers."

"Inmarsat faces intense competition every day in providing in-flight connectivity," added Rajeev Suri, Inmarsat CEO. "There is good reason to expect that intensity to increase given the power of well-funded new companies entering the sector. In the face of these changing market dynamics, the UK has much to gain by the presence of a strong satellite communications company, positioned to strengthen the country's position in the critical space sector, while supporting its national defence and growing jobs and investment. The combined Inmarsat and Viasat would be such a company."

As communicated by the CMA, Viasat and Inmarsat will actively participate in Phase 2. The companies will determine and communicate any updated expectations for the deal closing as engagement with the CMA continues throughout the Phase 2 investigation.

The proposed transaction has already secured several key regulatory approvals, most recently with the UK Government's clearance of the proposed transaction under the National Security and Investment Act, and over the summer from the Committee on Foreign Investment in the United States.

Forward-Looking Statements

This press release contains forward-looking statements that are subject to the safe harbors created under the Securities Act of 1933 and the Securities Exchange Act of 1934. Forward-looking statements include statements that refer to the enhanced competition resulting from the combination of Viasat and Inmarsat; the benefits to customers and users provided by the combined company; Viasat's expansion of IFC services globally resulting from the ViaSat-3 constellation and Inmarsat transaction; and the increase in jobs and investment in the UK space industry generated by the combined company. Readers are cautioned that actual results could differ materially and adversely from those expressed in any forward-looking statements. Factors that could cause actual results to differ include: risks and uncertainties related to the transaction, including the failure to obtain, or delays in obtaining, required regulatory approvals or clearances; the risk that any such approval may result in the imposition of conditions that could adversely affect Viasat, the combined company or the expected benefits of the transaction; the failure to satisfy any of the closing conditions to the transaction on a timely basis or at all; any adverse impact on the business of Viasat or Inmarsat as a result of uncertainty surrounding the transaction; the nature, cost and outcome of any legal proceedings related to the transaction; the occurrence of any event, change or other circumstances that could give rise to the termination of the definitive agreement for the transaction, including in circumstances requiring Viasat to pay a termination fee; the risk that Viasat's stock price may decline significantly if the transaction is not consummated; the failure to obtain the necessary debt financing arrangements set forth in the commitment letters received in connection with the transaction; risks that the transaction disrupts current plans and operations or diverts management's attention from its ongoing business; the effect of the announcement of the transaction on the ability of Viasat to retain and hire key personnel and maintain relationships with its customers, suppliers and others with whom it does business; the ability of Viasat to successfully integrate Inmarsat operations, technologies and employees; the ability to realize anticipated benefits and synergies of the transaction, including the expectation of enhancements to Viasat's products and services, greater revenue or growth opportunities, operating efficiencies and cost savings; the ability to ensure continued performance and market growth of the combined company's business; changes in the global business environment and economic conditions; the availability and cost of credit; risks associated with the construction, launch and operation of satellites, including the effect of any anomaly, operational failure or degradation in satellite performance; Viasat's or the combined company's ability to successfully develop, introduce and sell new technologies, products and services; changes in relationships with key customers, suppliers, distributors, resellers and others as a result of the transaction or otherwise; Viasat's and Inmarsat's reliance on a limited number of third parties to manufacture and supply their respective products; the risk of litigation or regulatory actions to Viasat and/or Inmarsat; inability to retain key personnel; the impact of the COVID-19 pandemic on Viasat's or Inmarsat's business, suppliers, consumers, customers, and employees or the overall economy; Viasat's and the combined company's level of indebtedness and ability to comply with applicable debt covenants; and other factors affecting the communications industry generally. In addition, please refer to the risk factors contained in Viasat's SEC filings available at www.sec.gov, including Viasat's most recent Annual Report on Form 10-K, Quarterly Reports on Form 10-Q, and the definitive proxy statement filed in connection with the transaction, and such reports that are subsequently filed with the SEC. Readers are cautioned not to place undue reliance on any forward-looking statements, which speak only as of the date on which they are made. Viasat undertakes no obligation to update or revise any forward-looking statements for any reason.
