

## Viasat Confirms ViaSat-3 Americas Satellite is Scheduled to Launch on April 18, 2023

April 13, 2023

CARLSBAD, Calif., April 13, 2023 /PRNewswire/ -- [Viasat Inc.](#) (NASDAQ: VSAT), a global communications company, today confirmed the scheduled launch date for the ViaSat-3 Americas satellite is April 18, 2023 during an approximately one-hour long launch window opening at 7:29pm EDT. The ViaSat-3 satellite will launch aboard a SpaceX Falcon Heavy from Launch Complex 39A (LC-39A) at NASA's Kennedy Space Center in Florida.

The satellite will be sent into geostationary transfer orbit by the launch vehicle and will provide broadband services from an orbital slot located at 88.9° west longitude.

### About ViaSat-3

The ViaSat-3 class of Ka-band satellites are expected to provide the best bandwidth economics in the industry with substantial flexibility to move and concentrate that capacity virtually anywhere there is demand - whether it is on land, in the ocean or in the air. The first two satellites are planned to focus on the Americas and on EMEA, respectively, and the ViaSat-3 EMEA satellite is now in environmental testing in Boeing's El Segundo, California factory. The third ViaSat-3 satellite is now undergoing final payload integration and testing at Viasat's Tempe, Arizona facility and will focus on the Asia Pacific region, completing Viasat's global service coverage.

### Forward-Looking Statements

This press release contains forward-looking statements that are subject to the safe harbors created under the Securities Act of 1933 and the Securities Exchange Act of 1934. Forward looking statements include among others, statements about the performance, capabilities and anticipated benefits of the ViaSat-3 class satellites, including projected bandwidth economics, coverage and flexibility; the timing of transport and launch of the ViaSat-3 Americas satellite; the process and timing of bringing the ViaSat-3 Americas satellite into service; and the construction and testing of the ViaSat-3 EMEA and ViaSat-3 APAC satellites. Readers are cautioned that actual results could differ materially and adversely from those expressed in any forward-looking statements. Factors that could cause actual results to differ include: risks associated with the construction, launch and operation of the ViaSat-3 class satellites, including the effect of any anomaly, operational failure or degradation in satellite performance; the ability to realize the anticipated benefits of the ViaSat-3 satellite platforms; unexpected expenses or delays related to the satellite system; the ability to successfully implement Viasat's business plan for broadband satellite services on Viasat's anticipated timeline or at all, including with respect to the ViaSat-3 satellite platforms; contractual problems, product defects, manufacturing issues or delays; regulatory issues; technologies not being developed according to anticipated schedules, or that do not perform according to expectations; and increased competition and other factors affecting the connectivity sector, generally. In addition, please refer to the risk factors contained in Viasat's SEC filings available at [www.sec.gov](http://www.sec.gov), including Viasat's most recent Annual Report on Form 10-K and Quarterly Reports on Form 10-Q. Readers are cautioned not to place undue reliance on any forward-looking statements, which speak only as of the date on which they are made. Viasat undertakes no obligation to update or revise any forward-looking statements for any reason.
