LOT Polish Airlines Selects Viasat to Deliver In-Flight Connectivity to Boeing 787 Dreamliner fleet

Jul 25, 2024

Trusted inflight connectivity solution chosen to enhance passenger experience and loyalty

CARLSBAD, Calif., July 25, 2024 /PRNewswire/ -- LOT Polish Airlines, Poland's flag carrier, and Viasat Inc. (NASDAQ: VSAT), a global leader in satellite communications, today announced officially that 15 aircraft across LOT's wide-body Boeing 787-8 and 787-9 Dreamliner fleets will be equipped with Viasat's trusted Ka-band, global in-flight connectivity solution.

LOT will offer inflight Wi-Fi for the first time as part of a major, ongoing upgrade to its Dreamliner fleets, which also includes a new internal cabin design, seat replacements and more, for a distinguished passenger experience.

Once in commercial operation, which is expected to begin no later than early CY 2026, these aircraft will be servicing LOT's routes from Warsaw Chopin, giving passengers the experience of high-quality inflight connectivity while travelling LOT's worldwide routes.

"At LOT Polish Airlines, we aim to deliver an exceptional passenger experience," said Izabela Leszczyńska, Director of Product Development and Customer Experience at LOT Polish Airlines. "As part of our cabin upgrade, which will provide a new quality of travel, we have partnered with Viasat, a global leader in connectivity, to implement our in-flight connectivity services. Soon we will be able to offer our passengers the much-awaited convenience. The ability to enjoy Internet access while flying will top off the many changes that the retrofit of our Boeing B787 Dreamliner will bring."

"As LOT embarks on this new era of connectivity for passengers, we are excited to be providing them and their passengers with the ability to message, surf and stream while in the air," said Don Buchman, VP and GM, Commercial Aviation at Viasat. "At Viasat, we are aligned on LOT's ambition to always strive to improve passenger experience. This is the start of a successful relationship that helps us to continue delivering on our mission to provide reliable, high quality in-flight Wi-Fi to passengers as they travel. As demand continues to accelerate across Europe, we look forward to bringing solutions to more passengers worldwide."

Powered by Viasat's global network, passengers flying on Viasat-equipped aircraft will benefit from video streaming, email, web browsing, and social media, among other offerings.

About LOT Polish Airlines
LOT Polish Airlines is a modern carrier connecting Central and Eastern Europe with the rest of the world. LOT's offer includes direct long-haul flights to airports in the United States, Canada, China, Japan and South Korea. The Polish carrier has been consistently increasing the number of its flights to those destinations, thus strengthening its position in Central and Eastern Europe. It operates its long-haul flights with Boeing 787 Dreamliner, one of the most advanced wide-body aircraft in the world. Present in the sky since 1929, the Polish carrier is the 12th oldest airline worldwide, being one of the most internationally recognisable Polish brands.

Forward-Looking Statements
This press release contains forward-looking statements that are subject to the safe harbors created under the Securities Act of 1933 and the Securities Exchange Act of 1934. Forward-looking statements include among others, statements related to Viasat and LOT Polish Airlines' relationship; the introduction of Viasat's IFC services on LOT's Boeing 787 Dreamliner aircraft; the enhanced internet experience passengers and crew can expect; the availability, capabilities and performance of the Viasat in-flight internet equipment, and the ability to direct capacity to demand. Readers are cautioned that actual results could differ materially and adversely from those expressed in any forward-looking statements. Factors that could cause actual results to differ include: our ability to successfully implement our business plan for our broadband services on our anticipated timeline or at all; risks associated with the construction, launch and operation of the satellite(s) used to supply these services, including the effect of any anomaly, operational failure or degradation in satellite performance; contractual problems; product defects; manufacturing issues or delays; regulatory issues; changes in relationships with, or the financial condition of, key suppliers; technologies not being developed according to anticipated schedules, or that do not perform according to expectations; and other factors affecting the aviation sector generally. In addition, please refer to the risk factors contained in Viasat's SEC filings available at www.sec.gov, including Viasat's most recent Annual Report on Form 10-K and Quarterly Reports on Form 10-Q. Readers are cautioned not to place undue reliance on any forward-looking statements, which speak only as of the date on which they are made. Viasat undertakes no obligation to update or revise any forward-looking statements for any reason.
